

Name: _____

Date: _____

Geometric Figures

Across

7. having the same measure

8. a triangle having no congruent sides

9. an angle that measures exactly 90 degrees

10. a triangle having 3 congruent sides

11. a triangle having one right angle

12. the common endpoint of 2 rays

13. 2 angles whose sum equals 180 degrees

Down

1. angles that have the same vertex and share a common side

2. a triangle having 3 acute angles

3. a triangle having one obtuse angle

4. a triangle having at least 2 congruent sides

5. 2 angles whose sum equals 90 degrees

6. opposite angles formed by the intersection of 2 lines; angles are congruent
