

# Geometric and algebraic

## Across

2. Transversal is a line \_\_\_\_\_ two or more lines at different points
5. Each angle of an \_\_\_\_\_ triangle is 60 degree.
7. A polynomial with degree one is called \_\_\_\_\_
9. A polynomial with degree two is called \_\_\_\_\_
10. A polynomial with three terms are called \_\_\_\_\_

## Down

1. The two axioms above together is called the \_\_\_\_\_
3. Diagonals of a rectangle bisect each other and are equal and \_\_\_\_\_
4. Angles opposite to equal sides of a \_\_\_\_\_ are equal
6. The \_\_\_\_\_ of a triangle divides it into two triangles of equal area
8. A polynomial with one term is called \_\_\_\_\_
