# Geometry 101: Test Your Knowledge;)

## Across

- 2. All angles have the same measure
- 4. 10 sides
- 8. 9 sides
- 9. A logical statement that has a hypothesis and conclusion (written in an if-then form)
- 10. Perpendicular segment from vertex to the opposite side
- 11. Segment from vertex to opposite midpoint

## Down

- 1. Point of concurrency of perpendicular bisectors
- 3. Intersects at a  $90^\circ$  angle
- 5. What is the point exactly half way between two points?
- 6. What type of angles have the sum of  $90^\circ$ ?
- 7. What is a pair of adjacent angles formed when 2 lines intersect called?
