

Geometry

Across

- 6. coplanar lines that do not intersect
- 7. a 90 degree angle
- 8. a 180 degree angle
- 14. To cut into 2 congruent parts
- 16. angles on different sides of the transversal between the 2 lines
- 17. angles on different sides of the transversal, not between the 2 lines
- 20. 2 lines that meet at a right angles

Down

- 1. an angle that is bigger than 90 degrees
- 2. part of a line with 2 endpoints
- 3. 2 rays with a common endpoint
- 4. a location with no size, 1 of the undefined terms
- 5. angles that are between the 2 lines on the same side of the transversal
- 9. angles that are opposite each other when 2 lines intersect

- 10. angles with the same vertex that share a side but do not overlap
- 11. angles not between the 2 lines that are on the same side of the transversal
- 12. 2 angles that have the same measure are _____
- 13. a 4 letter undefined term
- 15. A flat surface with no edges and no thickness
- 18. part of a line with 1 endpoint
- 19. an angle that is less than 90 degrees
