Geometry CrossWord

Across

- **2.** 2 parallel congruent faces of a prism
- 7. common endpoint of an angle
- **8.** the number of square units needed to cover a surface
- **10.** points that lie on the same plane
- **12.** a closed figure whose sides are all segments
- 13. collinear
- **14.** when segments have the same measure
- **17.** line segment where faces intersect on a solide

- **18.** formed by 2 noncollinear rays that have a common endpoint
- **19.** 2 angles with measures that have a sum of 90
- **20.** an angle whose measure is more than 90 degress but less than 180 degrees

Down

- 1. an angle that measures 90 degrees
- 3. 2 angles that lie in the same plane, have a common vertex and a common side, but no common interior points
- **4.** 2 angles that have a sum of 180 degrees
- 5. Angles adding to 180 degrees

- 6. distance around a circle
- **9.** a line containing a side of a polygon where no points of the line are in the interior
- **11.** An angle whose measure is less than 90 degrees
- **15.** a unit that results from dividing the circumference into 360 parts
- **16.** the point on a segment that divides the segment into 2 congruent segments
