

Name: _____

Date: _____

Geometry Definitions

Across

- 2. A line that connects two points (has two definite end points)
- 4. An exact location; has no size, only position
- 5. A long thick line made with a pen, pencil, etc.; is straight, extends in both directions without end
- 7. An angle less than 90 degrees
- 10. Two lines that never meet
- 11. An angle equal to 90 degrees

Down

- 1. Lines that are at right angles (90 degrees) to each other
- 3. An angle greater than 90 degrees but less than 180 degrees
- 6. A line with a start point but no end point (it goes to infinity)
- 8. The amount of turn between two straight lines that have a common end point
- 9. A point where two or more straight lines meet
