

# Geometry! Geometry! Geometry!

## Across

6. Two events that cannot occur at the same time.
7. Each of the pairs of opposite angles made by two intersecting lines.
8. An angle that equals 90 degrees.
9. Two lines that never touch and are always the same distance apart.
10. Extends in both directions and does not end.

## Word Bank

Parallel Lines  
 Theoretical Probability  
 Dependent Events  
 Mutually Exclusive Events

Line  
 Supplementary Angles  
 Complementary Angles

Vertical Angles  
 Adjacent Angles  
 Right Angle

## Down

1. The theory behind probability.
2. Two angles adding up to 180 degrees.
3. Either of two angles with a sum of 90 degrees.
4. Two angles have a common vertex and a common side.
5. The outcome of the first effects the outcome of the second.
