

Geometry Portfolio Project - By William LaCaze

Across

1. A triangle with all three sides of equal length.
3. The point of intersection of two sides of an angle.
4. A polygon with five sides.
13. Lines that intersect to form right angles are
15. An angle between 90 and 180 degrees is
17. Has four right angles. All sides are equal.
18. A polygon with 8 sides.

19. One side of the endpoint.

20. A solid shape that is perfectly round.

Down

2. A polygon with six sides.
5. An angle that measures 90 degrees.
6. Two angles whose measurements add up to 90 degrees.
7. An angle between 0 and 90 degrees is
8. A flat surface.

9. An angle that measures 180 degrees.

10. Distance around a circle.
11. A triangle with all three sides with different lengths.
12. Lines that have no points are
14. A straight line from the center to the circumference of a circle or sphere.
16. To cut into 2 equal parts.
