

Name: _____

Date: _____

Geometry Tools

Across

4. the point that divides a segment into two equal segments
 5. A line with two endpoints
 7. Has only location no size
 10. a part of a line that starts at an endpoint and extends forever in one direction
 14. Is a ray that divides an angle into two equal angles
 15. two rays with a common endpoint form a(n) _____.

16. points that are on the same line

17. a statement that is accepted as true without proof.

Down

1. points that lie on the same plane
 2. a line, segment, or ray that divides a segment into two equal segments
 3. one of two rays that form an angle.

6. a point at the end of a segment or starting point for a ray

8. a unit of angle measure there are 360 in a circle

9. it is flat with no thickness designated by 3 noncollinear points

11. lines in the same plane that do not intersect

12. the common endpoint of the sides of an angle

13. Has length no thickness and it is straight goes forever
