

# Geometry Vocab Unit 1

## Across

3. Points or lines that line in the same plane  
 4. Points or lines that dont line in the same plane  
 6. The exact middle point  
 9. Any object that can be used as a guide to draw a straight line  
 10. the process of drawing a figure using only a compass and a straightedge  
 11. a part of a line containing 2 end points and all points between them

12. A insturment used to draw circles and arcs of circles  
 14. An insturment used to measure angles in degress  
 15. Sharing a common line such as 2 interesting planes

## Down

1. 3 or more points that line on the same line  
 2. A part of an end point and contains all the points of a line without the end in one direction  
 5. A sharp end of a tool or weapon

7. a basic undefined term of geometry. Lines extend indefinitely and have no thickness or width.

8. See a line segment or ray  
 13. A flat surface that extends in all directions containing atleast 3 noncollinear pionts
