## Geometry Vocab

## Across

- 2. connects the midpoint of a trapezoid's legs
- 5. all sides congruent
- 7. a polygon that is not convex
- 9. if no line that contains a side of the polygon contains a point in the interior of the polygon
- 12. a quadrilateral with at least one pair of parallel sides
- 13. A plane figure that is formed by three or more sides and each side intersects with two other sides at one endpoint
- 15. a quadrilateral with both pairs of opposite sides parallel
- 16. if the legs of a trapezoid are congruent

## Down

- 1. a parallelogram with four right angles
- 3. a parallelogram with four congruent sides and four right angles

- 4. a quadrilateral that has two pairs of consecutive congruent sides equal
- 6. all interior angles are congruent
- 8. the segment that joins two nonconsecutive vertices
- 10. three or more segments that form a polygon
- 11. if a polygon is equilateral or equiangular
- 14. a parallelogram with four congruent sides
