Geometry Vocabulary

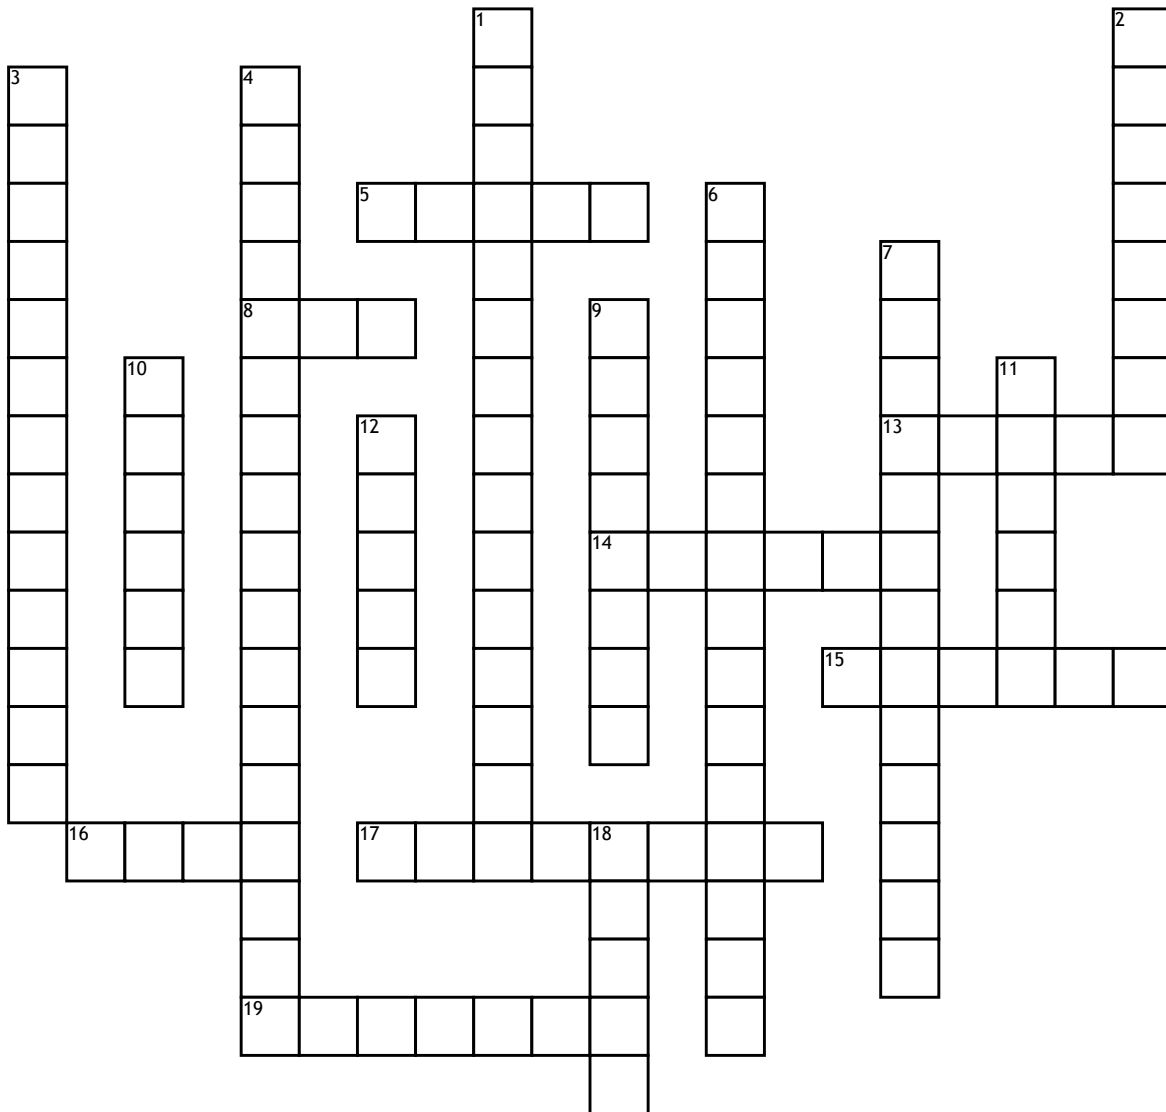

Across

5. an angle that measures exactly 90 degress

8. has one endpoint and a line that extends in one direction

13. Has one dimension. A spot in space

14. an angle that measures more that 90 degrees

15. the common endpoint of the rays

16. Has one dimension and extends in both directions without end

17. How far it is from point A to point B

19. consists of 2 endpoints and all the points in between

Down

1. angles with the same measure

2. an angle that measures 180 degrees

3. two angles that add up to 90 degrees

4. segments that have the same length

6. a segment, line, ray or plane that intersects at the midpoint

7. two angles that add up to 180 degrees

9. the point on a segment that divides the segment into 2 congruent segments

10. consists of 2 different rays and one vertex

11. to cut in half equally

12. the rays that make up the angle

18. an angle that measures less than 90 degress
