

Name: _____

Geometry Vocabulary

Across

2. a repeating pattern of figures that covers a plane without gaps or overlap

7. a line or point that divides a segment into two congruent segments

10. A parallelogram with four congruent sides

11. a part of a line that consists of two endpoints and all points in between

12. The segment from the center of a regular polygon to the center of a side

13. A segment whose endpoints are on the circle

14. a transformation in which the preimage is congruent to the image

Down

1. The ratio of adjacent over hypotenuse

3. an angle whose vertex is on the circle and whose sides are chords

4. a quadrilateral with two pairs of consecutive sides congruent and no opposite sides congruent

5. Two angles whose sum is 90

6. a dilation with a scale factor greater than 1

8. an if-then statement

9. a transformation that slides points the same distance and in the same direction
