Geometry Vocabulary

<u>Across</u>

- 1. Two angles that form a line
- **3.** Two lines that intersect in a plane and form right angles.
- **5.** The four inside angles formed by two lines cut by a transversal.
- **6.** A line that intersects two or more lines.
- **7.** Exterior angles that lie on the opposite sides of the transversal.
- 8. Having the same measure.

- **9.** Two angles that form a right angle.
- **10.** Angles that are in the same position on two parallel lines in relation to the transversal.
- 11. The four outer angles formed by two lines cut by a transversal.

Down

- **2.** Interior angles that lie on opposite sides of the transversal.
- **4.** Two lines that are in the same plane and do not intersect.
