Name: ______ Date: _____

Geometry Vocabulary Review

Across

- 6. lines that do not intersect
- **8.** angles that lie on the same side of the transversal
- **10.** part of a line with two end points
- **13.** a transformation where a figure rotates around a point
- 14. points that lie on the same line
- **16.** a triangle that has 3 equal sides
- **18.** two rays with the same end point
- 19. planes that do not intersect

20. two lines that intersect to form right angles

Down

- **1.** the common endpoint in an angle
- **2.** the point that divides the segments into two congruent segments
- **3.** a transformation where a figure is mirrored across a line
- **4.** a triangle that has 2 equal sides
- **5.** a plane figure that has same size and shape
- 7. an angle that is 90 degrees

- **9.** a solid shape that is perfectly round like a ball
- **11.** the amount of space occupied by a 3D object, measured in cubic units
- **12.** letter x and y in a math problems
- **15.** a polygon with 4 sides and 4 angles
- **17.** part of a line that has one end point and goes in one direction without end.
