

# Geometry Vocabulary Review Ch1 -3

## Across

6. Two lines that are in the same plane that never intersect  
 8. two rays that share an endpoint and extend in opposite directions  
 10. A line that has two endpoints  
 11. A location in space  
 12. a line that crosses two other lines in the same plane  
 13. A point that is in the middle of a segment

14. A geometric figure formed by two rays that share an endpoint

15. two angles whose sides are formed by opposite rays

## Down

1. Two small angles added together make a larger angle  
 2. two angles on the same side of the transversal in the same position for their angle groups  
 3. the collection of all points

4. A point that is the same distance from two other points

5. A line that has a single endpoint

7. A continuous extension of points that extends in two directions without end.

9. two lines that are not in the same plane and never intersect.
