# Geometry Vocabulary Review

## Across

6. An angle with degree measure 90 degrees.

7. A ray starts at a given point and goes off in a certain direction forever, to infinity.

8. Two angles that are adjacent and whose noncommon sides are opposite rays.

9. Two angles whose angle measures sum to 90 degrees.

10. Two lines that lie on the same plane and do not intersect.

11. The process of drawing a figure using only a compass and a straight edge.

## Down

1. Two angles whose measures have a sum of 180 degrees.

2. Lines that intersect to form right angles.

3. Angles that have the same measure.

4. In a plane, a line that intersects two or more lines, each at a different point.

5. two angles that share a common side and have the same vertex.
