Geometry

Across

- **3.** A straight line touching each side of the circle
- 6. Lines that never intersect
- **12.** A angle with a measure less than 90 degrees
- **13.** Connects two points continues in both directions forever
- **16.** A location in space
- **18.** Triangle with two sides congruent
- **20.** Two rays that share a common endpoint
- 21. Half the distance of the diameter
- 22. Angles that are next to each other
- **25.** A angle measuring exactly 180 degrees
- **26.** A quadrilateral with only one pair of parallel sides
- 27. A six sided figure

- **29.** Two angles who's measure equals 180 degrees
- **30.** Two angles who's measure equals 90 degrees

Down

- **1.** A four sided figure with opposite sides parallel
- 2. A five sided figure
- 4. The distance around a circle
- **5.** Angles that appear in identical places
- 7. Three sided polygon
- **8.** Angles opposite to each other when two lines cross
- 9. A four sided polygon
- **10.** Two lines that intersect and form a right angle
- 11. Lines that cross each other

- **14.** A angle with a measure over 90 degrees
- 15. Same length and size
- **17.** A part of a line connecting having two endpoints
- **19.** Triangle with all sides different lengths
- **23.** A angle that measures exactly 90 degrees
- **24.** A closed shape with three or more sides
- 28. A eight sided figure
