Geometry

Across

- **2.** The point that divides a segment into two congruent segments
- **4.** Lines that do not lie on the same surface or plane
- **11.** Points that do not all lie on a single line.
- **13.** Having the same size and shape
- **15.** is a pair of adjacent, supplementary angles
- 17. A flat surface
- 19. An angle of 180 degrees

- **20.** An angle that measures greater than 90 degrees but less than 180 degrees
- **21.** are simply line segments that are equal in length

Down

- **1.** Two angles whose measures have a sum of **90** degrees
- **3.** Two angles whose measures have a sum of 180 degrees
- **5.** An angle that measures greater than o degrees and less than 90 degrees
- **6.** lines in a plane which do not meet

- 7. A location that has no size
- **8.** have the same angle
- **9.** Points that lie on the same straight line
- **10.** A straight 180 degree angle
- **12.** lines that lie on the same plane.
- **14.** are two lines that do not intersect and are not parallel.
- **16.** 90 degree angle
- **18.** each of the parts into which something is or may be divided
- **22.** Part of a line that starts at an end point and extends forever in one direction
