

# Geometry extra credit

## Across

- 4.** Two lines on a different planes which intersect to form right angles  
**9.** The units used to measure an angle  
**10.** An angle that is more than 90 degrees  
**12.** A particular place or location  
**13.** A value that occurs most often  
**14.** Angle measure that is less than 90 degrees

- 16.** Two lines that don't intersect or touch each other  
**17.** Two angles whose sum together is 90 degrees

## Down

- 1.** The difference between the largest and smallest values  
**2.** A line with 2 points  
**3.** Flat surface that keeps spreading in all directions forever  
**5.** Endpoint on one side and keeps going on forever on the other

- 6.** Pair of adjacent angles whose sum is 180  
**7.** A number made of a whole number and a fraction  
**8.** An angle whose measure is exactly 90 degrees  
**11.** An angle that measures 90 degrees  
**15.** The sum of values divided by the number of values
