

Name: \_\_\_\_\_

Date: \_\_\_\_\_

# Greg NWEG Crossword Puzzle

## Across

3. Give a factor that affects network protocol processing costs  
 6. Communications and networking have changed from telephony to \_\_\_\_\_ services  
 9. A question in all methods and at all levels of abstraction is regarding the traffic or \_\_\_\_\_ used for the evaluation  
 10. What is the time latency to deliver a unit of data over a link or a network ?  
 12. what network did telephone networks dictate the development of ?  
 13. Something through which packets are sent and received to and from the network is called a \_\_\_\_\_ ?  
 14. What is the acronym for cyclic redundancy check ?

16. Which of the two requirements for a network is responsible for the performance ?  
 18. What does DMA stand for ?  
 19. What is the minimum amount of components that a processing system for a network needs ?  
 20. What is an example of real time applications that are interested in throughput and need a steady packet delivery

## Down

1. Give a cause for packet loss  
 2. What is an important requirement that leads to systems and users perceiving gradual degradation of network performance under load ?  
 4. Evaluation in networking is often based on what type of techniques ?

5. What is the acronym for The embedded microprocessor benchmark consortium ?  
 7. What does IP stand for ?  
 8. Network systems enable \_\_\_\_\_ delivery of application data  
 11. How many events are there for packet reception from a network ?  
 15. What is the dominating factor in networks with short fixed-sized packets ?  
 17. Give an example of a quantitative parameter ?
