

Heredity and Genetics

Across

- 4. Different forms of genes
- 5. the likelihood that an event will occur
- 9. someone who has one recessive allele for a trait but doesn't show it
- 10. all the DNA in one cell of an organism
- 11. a picture of all the chromosomes of a cell

13. Has two identical alleles for same trait

14. Two identical alleles (purebred)

15. two different alleles (Hybrid)

Down

1. 23 pair or 46 chromosomes

2. an analysis of a genome to determine inherited traits

3. has two different alleles for same trait

6. When a chromosome is not copied correctly

7. Human chromosomes that determine gender

8. A characteristic caused by genetics or environment

12. A chart that tracks a particular trait in a family
