

Name: _____

Date: _____

Histology Tissues

Across

1. Type of epithelium lining the vascular system
3. Membrane which lines the pericardial and pleural cavity
6. Transmits electrical impulses throughout the body
11. Epithelium that deceptively looks like it is more than one layer
12. Hair-like projection from the apical cell surface
13. Allows movement

14. Lines body cavities and covers body surface
16. Epithelium that is one cell layer thick
17. Epithelial tissue type where the width, height and depth of a cell appears equal
18. Type of epithelium lining the urinary system

Down

2. Glands that secrete product through a duct
4. Flat epithelial tissue

5. Epithelium that is more than one layer
7. Types of epithelium lining body cavities
8. Muscle tissue found in the heart
9. Glands that secrete products directly into the blood
10. Mucous membrane
15. Cells of the mucous membranes secretes _____ which helps to trap dust
