Date: _____

Hominin Evolution

Across

3. There are considered to be archaic homo sapiens and _____ homo sapiens.

10. The _____ child was the first fossil discovered of *Australopithecus africanus*.

11. _____ evolution is when different phenotypic traits evolve at different points in time of a lineage.

12. First homo species to probably use stone tools.

15. Which homo species is it agreed upon that probably first used fire?

16. One of the most important pieces of evidence found for *Australopithecus afarensis* are the _____ footprints.

Down

1. Hominins show a significant increase in this trait throughout their evolutionary lineage.

2. The robust archaic hominins consist mostly of what genus?

4. Is the earliest biped we have on record.

5. Bipedalism and _____ are two of the more important morphological traits for analyzing hominin fossils.

6. This homo species coexisted with homo sapiens and hybridized with us.

7. The "hobbit" homo species that was found in Indonesia.

8. This form of locomotion is a major novelty in the history of hominin evolution.

9. First *Australopithecus* species ever discovered.

13. Probably the most famous hominin fossil ever discovered.

14. _____'s rule dictates that large animals tend to evolve small bodies and small animals tend to evolve large bodies on islands.
