

Name: _____

How Well do You Know Data Integrity?

Across

2. Record of GMP critical information (e.g. addition, change, or deletion of GMP relevant data) which permit the reconstruction of GMP activities.

6. Data that describe attributes of other data to provide context and meaning (e.g. mL, PPM, and inches).

8. This is used to ensure electronic data is attributable to the person performing the activity.

9. Location of the PGS Franklin Data Integrity Plan.

10. These are not allowed in areas where records are created to prevent destruction of GMP records within their retention period.

12. Records in the format in which they were first generated.

13. Records are required to be retained for a length of time as per this Pfizer program (acronym).

14. Documentation using permanent, indelible ink. Changes have single line cross-outs with initial, date, and explanation if needed.

15. A process used at Franklin to prevent unauthorized photocopying of documents.

Down

1. Records and documentation retained in the format in which they were originally generated.

3. Data are recorded at the time they are generated.

4. Adjective to describe traceability to a unique individual or source of data.

5. Data are correct, truthful, valid, and reliable.

7. Permanent evidence of our actions and outcomes as they occur.

11. Adjective used to describe electronic media types used to permanently store data at the time of the activity (e.g. database or hard-drive).
