

Human anatomy

Across

- 5. Glassy cartilage covering the bone
- 9. Connects the anterior inferior iliac spine to anterochanteric line
- 12. Fibrous articulation between teeth
- 13. Interarticular fibrocartilage separating the articular surfaces of tibia and fibula
- 14. Joints present in pubic symphysis

- 15. Displacement of articulating bone

- 16. Partial dislocation

- 17. Tearing of connective tissue

- 18. Connective tissue that attaches bone to bone

- 19. Slightly movable joint

- 20. Freely movable joint

Down

- 1. Fluid within the joint capsule

- 2. Joints connecting the bones of the skull

- 3. Immobile joint

- 4. Membrane surrounding joint cavity

- 6. Inflammation of the bursa

- 7. Connective tissue that attaches muscle to bone

- 8. Joint allowing folding movement

- 10. Space filled with synovial fluid

- 11. Inflammation of joints seen in elderly
