

# Hunter Education Review

## Across

2. The wise use of natural resources
4. An act that provides funding for the selection, restoration, and improvement of wildlife habitat
9. The area where the heart and lungs are located
10. When the primer is located on the edge of the ammunition
12. You've pulled the trigger and the firearm does not fire
14. The inside of the barrel
19. You leave this on until you are ready to shoot
20. Ammunition used in a shotgun
21. Type of ammunition used for waterfowl hunting

22. You've pulled the trigger and the firearm has a delay in firing
23. The most steady shooting position
24. The color of clothing you should wear while hunting (fluorescent, blaze or hunter)
25. Choke size with the most open shot pattern

## Down

1. When the primer is located in the center of the ammunition
3. The international signal for distress (number)
5. The name for the end of the barrel
6. The type of gunpowder used in muzzleloaders

7. This eye sends better information to your brain than the other eye
8. Aldo Leopold described this as, "Doing the right thing when no one is watching, even when doing the wrong thing is legal."
11. Broadheads should always be kept
13. The type of carry that is the most steady (two-handed...)
15. One of the factors that contributes to spoiled meat (the others are heat and dirt)
16. Tightest choke pattern
17. The mechanism that loads, unloads, fires and ejects ammunition
18. Ammunition used in a rifle or handgun
