

Name: _____

Date: _____

Hydrologic Cycle

Across

- 2. the continuous movement of water through three states (2 words)
- 4. When water filters down into the Earth
- 7. What hydro means
- 8. When water seeps/sneaks into the cracks into the Earth
- 12. Energy from the sun
- 13. the source of energy that drives the Water Cycle
- 16. water falling to earth as snow or rain
- 17. The state of water that flows
- 18. The state of matter with the most energy

- 19. When a liquid becomes a solid

- 21. the general direction water flows during precipitation
- 22. Creates the wind in the air and the currents in the ocean
- 23. the number of 'states' water can exist in
- 24. When something is slowly gathered (like water in the ocean)
- 27. transformation of water to gas
- 28. When oxygen and carbon dioxide are being used and made by plants and animals (two words)

Down

- 1. continuous series of events that has no end
- 3. water flowing across land

- 5. Evaporation through the leaves of plants

- 6. another name for the gaseous state of water (2 words)

- 9. What plants put out and animals with lungs breathe in

- 10. water flowing across land

- 11. What plants take in and animals with lungs put out (two words)

- 14. the number of 'states' water can exist in

- 15. When a solid changes to a liquid
- 20. water vapor reforming as liquid droplets

- 25. the general direction of water during evaporation

- 26. 97% of Earth's water is here
