## Across

1. Any number entered into a cell  
 8. The name of the cell that is found by combining the Column Letter with the Row Number.  
 10. Calculations that update automatically if referenced data changes.

## Down

2. The cell in the spreadsheet that is currently selected for data entry  
 3. An electronic document in which data is arranged in the rows and columns of a grid and can be manipulated and used in calculations.

4. Microsoft program used to create spreadsheets  
 5. Headings and descriptions to make the spreadsheet easier to understand.  
 6. The area is used to specify a range of cells that will be printed, rather than printing an entire worksheet. This is particularly useful for very large worksheets with multiple columns and rows.
