# Identifying Shapes

## Across

3. A 3D solid figure with 6 faces and 8 vertices.  
 6. A 6 sided flat figure and the sides are the same.  
 7. A 2D figure that has 4 sides, 2 long sides and 2 short sides.  
 9. A 3D solid figure with 2 circle faces and is circular.  
 11. A 2D figure with no sides and no vertices.

12. A 2D flat figure with 4 sides, 1 long, 1 short and 2 parallel sides.

13. A 3D solid figure that has triangular sides and a square base.

## Down

1. A 3D solid figure that has 6 faces that are rectangles.

2. A 3D solid figure that has 2 triangle and 3 rectangle faces.

4. A figure with 4 sides that are the same and 4 vertices.

5. A 3 sided flat figure with 3 angles.

8. A 3D solid figure with a circle face and it is curved.

10. A 3D solid figure that has no faces and no vertices.
