## Across

1. can have either a positive or a negative correlation to population size
6. graph showing the proportion of a population living after a given age
9. Any factor limiting the size of a population
10. growth rate decreases as the population reaches carrying capacity
11. proportion with which a disease appears in a population

13. invest more heavily in fewer off springs
14. maximum population size
15. The number of children who would be born per woman
16. relative number of individuals of each age in a population
17. sum of the environmental factors
- Down**
2. population increase over time
3. produce high percentage of offspring

4. groups of individuals belonging to the same species
5. the average period that a person may expect to live
7. unrestricted growth of populations resulting in the maximum growth of that population
8. number of people who die in a given year
12. calculate the dynamics of a population
