

Inference theory

Across

- 4. the way in which items are stored
- 5. type of LTM that can be recalled without conscious awareness
- 6. how many items a store can hold
- 8. where old learning prevents recall of more recent information

- 9. this is more susceptible to inference
- 11. a type of interference where new learning prevents recall of previously learned information.
- 12. when items stored in the LTM, but cannot be recalled, lack...

Down

- 1. the time in which items can remain in a store
- 2. the result of disruption or confusion
- 3. the main theory involved in forgetting
- 7. a memory with meaning is a memory
- 10. when items are not encoded, they lack...
