

Inside the Cell

Across

6. This thing breaks down the waste, food, and even the old cell parts.

9. This is the protective outer cover of the cell.

10. This helps maintain the cells shape.

12. This is made of 2 or more different tissues and they work together.

13. This takes and delivers different types of materials throughout the cell.

14. This contains a membrane bound structure.

15. They accomplish related tasks and are a group of organs.

16. This is found in plant cells, are green organelles, and produces food.

Down

1. This makes ribosomes and is found in the nucleus.

2. This doesn't contain a membrane bound structure.

3. This is a group of similar cells that work together.

4. This surrounds the nucleus of a eukaryotic cell, double membrane.

5. This helps prep and modify cellular products and gets it ready to be able to travel.

7. This is a site of the cellular respiration.

8. This is something strong that helps the cell membrane and provides support to the cell.

11. This controls all of the activities in the cell.
