

Introduction of Biology

Across

2. movement of materials into, out of or throughout an organism
6. Organisms make or build compounds
7. The sum of all chemical activities
8. Removal of wastes made by cells metabolism
9. Produce more of a species
10. The study of life

11. Activities that are performed by all living things

Down

1. Increase cell size or cell number
3. Control and coordination of life activities
4. Convert food energy to cellular energy
5. Consume materials from the environment and convert them to a usable form
