

Introduction to the Circulatory System

Across

2. The blood leaves your heart from which chambers

5. The main organ in the circulatory system

7. Blood vessels that carry deoxygenated blood to the heart

9. Blood vessels that carry blood away from the heart

10. The organ that gives oxygen to the blood

11. The blood vessel that carries deoxygenated blood into the right atrium

12. The left atrium receives oxygenated blood from the

14. A wall that separates the left and right side of the heart

Down

1. The gas that is removed as waste by our circulatory system

3. Tiny blood vessels that are the site of gas exchange

4. Flaps of tissue that prevent blood from flowing backwards in the heart

6. The number of chambers in a human heart

8. The largest artery in the body

13. The gas that is transported to our cells in the circulatory system
