Jessies science choice board

Across

- **3.** Moving into a population
- **6.** In organism that obtains energy by feeding on other organisms
- **8.** The largest population that area can support
- **10.** Organisms compete for the limited number of biotic and abiotic factors
- **12.** The pattern of overlapping food chains in an ecosystem
- **13.** Hey symbiotic relationship in which one organism benefits and the other is unaffected

- **14.** Siri of vents in which one organism eats another
- **15.** Will be living and nonliving things that interact in an area **Down**
- 1. All the different populations that live together in an area
- 2. The part of earth, Including air, land, surface rocks, and water, within which life occurs
- **4.** The first species to populated an area

- **5.** A diagram that shows the amount of energy that moves from one feeding level to another in a food web
- **7.** An animal that eats only other animals
- **9.** Organisms that return nutrients to the soil and breakdown dead organisms
- **11.** The study of how living things interact with each other and their environment
