

# Key Terms

## Across

3. The area that drains into a single river in the watershed for that river
4. A place on the coast where vessels may find shelter, especially one protected from rough water by piers, jetties, and other artificial structures
5. The area of seabed around a large landmass where the sea is relatively shallow compared with the open ocean
7. The original point from which the river flows
12. A flat, elevated landform that rises sharply above the surrounding area on at least one side
17. Height above a given level, especially sea level
19. A headland or a promontory of large size extended into a body of water, usually the sea
21. A deep gorge, typically one with a river flowing through it
22. Smaller than oceans and are usually located where the land and ocean meet
23. A naturally formed, narrow, typically navigable waterway that connects two larger bodies of water
24. A deep inlet of the sea almost surrounded by land, with a narrow mouth

26. The elevation boundary separating areas that are drained by different water systems

27. A piece of land that is boarded by water on three sides but connected to mainland

29. Narrow strip of land connecting two large areas otherwise separated by bodies of water

30. The part of the land near the sea

31. A landform created by deposition of sediment that is carried by a river as the flow leaves its mouth and enters slower-moving or stagnant water

33. A low area between hills or mountains typically with a river running through it

34. A flat, sweeping landmass that generally does not change much in elevation

## Down

1. An area at the base of a mountain or mountain range

2. A stream or river that flows into a larger stream or main stem river or lake

6. The apparent boundary between the Earth and Sky

8. Group of scattered islands

9. A broad inlet of the sea where the land curves inward

10. The imaginary line between two parallel rivers, at the point where rivers plunge, or fall, at roughly the same elevation

11. A large platform that rises above the surrounding land in a limited area, usually in the form of a peak

13. Any area of land smaller than a continent and entirely surrounded by water

14. Where a river and ocean connect

15. A natural flowing watercourse, usually freshwater, flowing towards an ocean, sea, lake, or another river

16. Any of the world's main continuous expanses of land

18. An area made fertile by a source of freshwater in an otherwise dry and arid region

20. Large bodies of water that are surrounded by land and are not part of an ocean

25. A landform that extends above the surrounded terrain

28. The height of the sea surface averaged over all stages of the tide over a long period of time

32. A body of water that composes much of a planet's hydrosphere
