# Kinematics Unit

## Across

- 4. quantities described by magnitude and direction
- 7. total displacement
- 9. how much ground it covered
- 10. speed given at any time

## Down

- 1. average of all speeds

- 2. how far from original position

- 3. branch of kinematics

- 5. how fast an object is moving

- 6. rate which an object changes position

- 8. quantities described by magnitude
