# Knowing Weather Terms

## Across

2. Large volume of air

4. Measures humidity

10. Variables in the atmosphere

11. A region with particular prevailing weather conditions

12. Between latitude 30°N and 30°S two belts of wind

13. Measure air pressure

14. Atmospheric temperature

15. Measures wind speed

## Down

1. Wind system located between latitude 30°N and 60°N

3. Wind zones between 60°(N)orth Pole and 60°(S)outh Pole

5. Change in Frequency due to motion of a wave

6. Results in fluids and objects moving in a curved path instead of a straight line

7. Area over air mass forms

8. Measure temperature with Fahrenheit or Celsius scale

9. Between latitude 30°N and 30°S two belts of wind
