

# Lab

## Across

2. Where material is placed before entering the core
6. technique that uses ultrafiltration membranes to completely remove, replace, or lower the concentration of salts or solvents from solutions containing proteins, peptides, nucleic acids, and other biomolecules
8. separates analytes based on differences in their surface charge.
10. assignment of a number to a characteristic of an object or event
11. large biomolecules, or macromolecules, consisting of one or more long chains of amino acid residues.

## Down

1. System to input and approve vendor invoices to be paid
3. Device that measures
4. Microbial limit test
5. designed for capture and intermediate purification of proteins from large feed volumes
7. Analysis used to determine water quality
9. computerized maintenance management system
