

Laboratory equipment

Across

- 6. This is a small glass container used for mixing or heating chemicals
- 7. This is a larger glass container used for mixing or heating chemicals
- 10. This is a container used for holding chemicals
- 11. This is a flat bottomed contained used for chemical reactions

Down

- 1. You must check these before using chemicals to stay safe

- 2. This is used to heat substances
- 3. These must always be worn during experiments
- 4. This is used for measuring liquids
- 5. This is used to measure temperature
- 8. These are used to pick up hot objects
- 9. This is used to transfer solids from one place to another
