

Language Of Geometry

Across

2. Two angles that add up to 180 degrees
 5. A 3 sided polygon
 7. Sides of a triangle that are having sides unequal in length
 8. A polygon with at least one interior angles that measures $>$ than 180 degrees
 9. All properties of a parallelogram, rhombus, & rectangle
 14. Two angles that add up to 90 degrees
 15. The quality of being made up of exactly similar parts facing each other

17. A 6 sided polygon

21. Quadrilateral with 1 pair of parallel sides

22. A 8 sided polygon

23. Quadrilateral with 2 pairs adjacent sides congruent and opposite sides congruent

25. A 5 sided polygon

26. The longest side of the triangle

Down

1. A 10 sided polygon

3. All properties of parallelogram

4. A polygon with interior angles that measures $<$ than 180 degrees

6. Quadrilaterals with both pairs of opposite sides are congruent

10. A with a start and end point

11. Opposite leg/Hypotenuse

12. A 12 sided polygon

13. A line with a starting point with no ending point

16. Parallelogram with all congruent sides

18. A 9 sided polygon

19. A 7 sided polygon

20. The total of all the sides added together

24. The space between two intersecting lines or surfaces at or close to the point where they meet.
