# Layers of the Earth

## Across

- 4. Earth's heat source
- 6. The lower part of the mantle, above the outer core
- 8. Earth's crust and solid upper mantle
- 9. Seismic waves that travel through all layers of the Earth
- 10. The layer under the Lithosphere

## Down

- 1. Vibrations that travel through Earth that are caused by earthquakes
- 2. The inner most layer of the Earth
- 3. Earth's only liquid layer
- 5. Shaking at the surface of Earth due to plates moving
- 7. Seismic waves that only travel through solids
