

Learning Approach

Across

4. What is it when a individual with a conditioned response to one stimulus responds to similar stimuli in the same way? (2)
7. Who carried out research on animals using the 'operant chamber'?
9. What treatment of phobias involves stops phobic responses quickly with immediate exposure to a very frightening situation?
10. Who investigated 'Cyber dehumanisation'? (Contemporary study)
11. What did The Skinner Box investigate? (2)
15. What is it called when the CS and the UCS have not been paired for a while and the CS ceases to elicit the CR?

16. Which psychologist underwent a study with salvation in dogs (classical conditioning)?

18. What do you call the process of modifying behaviour by reinforcing successive approximations to a desire behaviour?

20. Who created the theory that phobias are acquired using classical conditioning and maintained using operant conditioning?

21. Attention, Retention, Reproduction and Motivation are all stages of what?

Down

1. Cook and Mineka suggested another mechanism for the acquisition of phobias to be through what? (2)

2. What's it called when one individual displays a particular social behaviour in front of another?

3. Systematic desensitisation is a type of learning called...?

5. What's the name of a plan of how often and when reinforcement will be provided?

6. Who underwent the 'Little Albert' experiments? (Classic study) (2)

8. Which type of conditioning is 'learning by association'?

12. Which model explains the maintainance and acquisition of phobias?

13. What's an alternate word for 'copying'?

14. Who developed the social learning theory?

17. Aggression in cartoons, films and 'live' were studied by who?

19. The anxiety hierachy, relaxation and exposure are designed to reduce phobic anxiety with what approach?
