

# Learning chapter 5 vocabulary

## Across

3. The intense dislikes and /or avoidance is a particular food rbag has been addiciated with nauea or discomfort
7. A menatal repretation of a spatial arrangements such as a maze
8. A form of behavior modification in which tokens earned for performing desired behaviors can b exchanged of responsive reinforcers.
11. Learning to perform a behavior because it prevents or terminates an averise stimulus
14. A reinforcement schedule in which the correct response is reinforced after varying lengths of time following the last reinforcement.
15. In class conditioning the weakning and eventual disappearance of the conditioned response as a result of repeated presentation

16. A schedule in Which a reinforce is given following the first correct response after a specific period of time has elapsed
17. The individual who demonstrate a behavior or whose behavior is imitated
18. A stimulus that elicits a specific unconditional response without prior learning
19. The learning ability to discrimination between similar stimuli so that the conditioned response occurs only to the original conditioned stimulus but not to similar stimuli
20. Anything that follows a response and strength it or increase

## Down

1. The spontaneous return of a conditioned response following extinction.

2. A response that is elicited by an unconditioned stimulus without prior learning
4. The use of sensitive equipment to give people precise feedback about internal
5. Exhibiting a behavior similar to that shown by a model l an unfamiliar situation
6. An acquired or learned response to a conditioned stimulus
9. A voluntary behavior the accidentally bring about a consequence
10. A relatively permanen change in Behavior knowledge capability or attitude that is acquired through experience and cannot be attributed to illness
12. any event or object in relation to which an organisms response
13. In classical conditioning the tendency to make a conditioned response
