# Lesson 8-9 vocab

Across

1. An animation effect that occurs when an object is entering the slide.

2. An animation effect that moves an object along a specified path.

5. An animation setting that causes the animation to begin executing simultaneously with the previous animation or event.

6. An animation setting that determines how long an animation effect should take to execute

8. Horizontal and vertical measures that help you position objects on a slide.

12. An animation effect that causes an object to move, change color, or otherwise call attention to itself when it is neither entering nor exiting the slide.

15. The movement from one slide to the next.

16. An animation sequencing setting that causes the animation to trigger after the previous event has finished. Compare to With Previous.

18. To remove a portion of a picture or shape that is not needed. The cropped portion is hidden until you compress the picture.

19. A feature that copies animation settings from one object to another

20. An animation effect that occurs when an object is exiting the slide.

23. An animation setting that specifies how long the effect should pause before it begins.

26. A movie, animated graphic, or motion video clip.

29. A grid of horizontal and vertical lines that can be used as guides when positioning objects on a slide.

30. A recording of your screen motions that allows you to illustrate an action on your computer with or without audio to show viewers how to do something.

31. A feature that enables a user to select color wash to place over an image or to set it to grayscale, black and white, or washout.

Down

3. Nonprinting vertical and horizontal lines that you can move or copy to align objects on a slide

4. The relationship of width to height in a picture or shape.

7. An image that displays on a slide when a video clip is not actively playing.

9. A pane that enables you to manage all the animation effects on the active slide.

10. Dashed lines that help a user with alignment as shapes are moved around a slide.

11. A sound or music clip

13. An effect you apply to placeholders or other content to move the content in unique ways on the slide.

14. A trigger for an animation or transition that occurs when the mouse is clicked.

17. The intensity of a color. The more saturated, the more bright the colors appear.

21. Predrawn artwork in a wide variety of styles. Office clip art files can include drawn graphics, photographs, sounds, and animated graphics.

22. A word or phrase that describes a subject or category on which you can search.

24. The subtle tint of an image's color, ranging from warmer shades (more red) to cooler shades (more blue)..

25. An action where you select an entire graphic while holding hold down the left mouse button

27. The way in which objects stack up on a slide as you create them.

28. A feature that enables a user to select color wash to place over an image or to set it to grayscale, black and white, or washout.
