

Linear Equations

Across

7. A line that goes left to right and intersects the y-axis.

11. A point where a line, curve, or surface intersects the x-axis.

13. A special relationship where each input has a single output.

14. Lines with the same slope.

15. $Ax+By=C$

16. $Y=mx+b$

17. The simplest form of a function.

Down

1. Graph of a V.

2. Lines with opposite reciprocal slopes.

3. All the input values of a function.

4. A point where a line, curve, or surface intersects the y-axis.

5. A number that describes both the direction and the steepness of the line.

6. $y-y_1=m(x-x_1)$

8. A line that goes straight up and down and intersects the x-axis.

9. Equation that includes $<$, $>$, \leq , \geq

10. Any function that graphs to a straight line.

12. All the output values of a function
