# Linear Relationships

Across

7. Straight line that passes through the origin

9. What makes a line linear

12. The "b"eginning of a graph

13. A vertical line

15. Another word for Linear Proportional

16. What do you call a straight line

Down

1. What is the slope of the line with an equation y = 4x - 5

2. A line that goes up and to the right

3. When you are asked to find the equation of a table, what should you use

4. The cost for one?

5. An equation in the form y = mx + b is written in what form

6. A horizontal line

8. A line that goes up and to the left

10. What is the slope of the line that passes through the points (-2, 1) and (1, 4)

11. What do you call the point (0, 0)

14. What is the y-intercept of the equation y = 9 + 5x
