

Name: \_\_\_\_\_

# Lockout / Tagout

## Across

4. Locks used for lockout / tagout must all be the same shape, \_\_\_\_\_, and size.

6. If you see a lock on a machine, never attempt to \_\_\_\_\_ it.

7. An employee who locks and tags out a machine to work on it is called an \_\_\_\_\_ employee.

8. Lockout / tagout blocks the flow of \_\_\_\_\_ to a piece of equipment.

9. When multiple employees work on a machine during lockout, \_\_\_\_\_ of them must apply a lock and tag to each lockout point.

10. Tags must be labelled to \_\_\_\_\_ the employee who is working on the equipment.

## Down

1. Each authorized employee and machine-specific procedure must be inspected at least once each \_\_\_\_\_.

2. An employee who works near, but not on, a machine during lockout / tagout is called an \_\_\_\_\_ employee.

3. Authorized employees must follow the machine-specific \_\_\_\_\_ to lock out the energy.

5. Failure to follow lockout procedures may result in death, severe injury, or \_\_\_\_\_ or employment.
