

Lymphatic diseases

Across

9. a condition in which acidic gastric fluid is regurgitated into the esophagus, causing heartburn.

10. a disease characterized by inflammation of the liver.

11. A cancer of blood-forming tissues, hindering the body's ability to fight infection.

13. a malignant but often curable disease of lymphatic tissues typically causing painless enlargement of the lymph nodes, liver, and spleen.

14. an excessive localized enlargement of an artery caused by a weakening of the artery wall.

15. The abnormal growth of skin cells.

16. are hard masses of minerals in your bladder

18. Cancer that begins in the organ lying behind the lower part of the stomach

19. A cancer of the colon or rectum, located at the digestive tract's lower end.

Down

1. A chronic inflammatory bowel disease that affects the lining of the digestive tract

2. a serious medical condition in which the appendix becomes inflamed and painful

3. inflammation of the kidneys.

4. a hard mass formed in the kidneys, typically consisting of insoluble calcium compounds; a renal calculus.

5. a small, hard crystalline mass formed abnormally in the gallbladder or bile ducts from bile pigments, cholesterol, and calcium salts.

6. an open sore on an external or internal surface of the body, caused by a break in the skin or mucous membrane that fails to heal.

7. A condition in which the blood doesn't have enough healthy red blood cells.

8. begins when cells in the urinary bladder start to grow uncontrollably

12. a chronic disease of the liver marked by degeneration of cells, inflammation, and fibrous thickening of tissue. It is typically a result of alcoholism or hepatitis.

17. a medical condition in which patches of skin become rough and inflamed, with blisters that cause itching and bleeding, sometimes resulting from a reaction to irritation
